EXPERIENCE

WebKnot Technologies, Bangalore - [Full Stack Developer](#)

MARCH 2020 - JULY 2020

- Worked in a team of 5 members implemented grocery ordering portal named KIRANA.
- Added a few core features to the Horizon Application such as resume finder, subscription plans section and payment history.
- Operated as tester and bug resolver for the same.

PROJECTS

BlockTrade

[Source-Code](#)

- Worked with a team of 3 people on a blockchain-based project which sought to replace banks in conducting international trade.
- The platform handles document verification, approval, transaction and some part of the supply chain.
- Covers the entire legal aspect of the trade ensuring automation of the process, improved efficiency and enhanced security.
- Technology Stack- **React, NodeJS**, IPFS, Flutter

Dermo-Solutions

[Source-Code](#)

- Collaborated with 5 people to create the platform in 4 days which connects patients with dermatologists where doctors can treat patients online.
- An auto-generated report is sent to the patient which is downloaded on their local device.
- Uses machine learning algorithms to identify 6 skin diseases and common medications.
- Technology Stack- **React**, Flask, Flutter, Firebase, CNN, VGG16

Cosmicom

[Source-Code](#)

- Collaborated with another 2 people to create an E-commerce portal which connects the buyers, shippers and customer via a single platform.
- Technology Stack- **React, NodeJS, PostgreSQL**

AWARDS

- **Winners** of Manipal TechTatva - a national level hackathon comprising 6 domains conducted by Manipal Institute of Technology with 800+ participants.
- Ranked among **top 10** teams in Pascathon at Pune Institute of Computer Technology with 100+ teams.
